## PROFESSIONAL SUMMARY

Full Stack Developer and Computer Engineering student with a strong background in LAMP & MERN stacks, React, and Laravel. Experienced in building deployed E-commerce and management systems for local businesses. Skilled in Linux environments, VPS hosting, and database administration. Currently launching a freelance web development agency.

## TECHNICAL SKILLS

- **Languages:** PHP, JavaScript (ES6+), TypeScript, SQL, Python.
- **Frameworks:** Laravel, React.js, Next.js, Node.js, TailwindCSS.
- **Tools & Platforms:** Docker, Git/GitHub, Linux (Ubuntu/Fedora), Jira (Agile), Cisco Packet Tracer.
- **Languages:** English (Professional), French (Intermediate), Arabic (Native), German (Beginner).

## EXPERIENCE

### Founder & Lead Developer | Sitewebk (Freelance)

Rabat, Morocco | Dec 2025 – Present

- Establishing a freelance web agency focused on high-performance e-commerce and business management solutions.
- Configuring LAMP stack environments on Linux servers for client project deployment.

### Freelance Full Stack Developer | Maison Alaben

Casablanca, Morocco (Remote) | Nov 2025 – Dec 2025

- Developed a high-traffic, performance-focused E-commerce website for a traditional Moroccan pâtisserie and restaurant.
- Deployed the application using a self-hosted VPS, ensuring low latency and high availability.
- Automated the ordering process with pre-built messaging templates to streamline customer communication.

## Freelance Full Stack Developer | Electrobaba

Azrou, Morocco | Apr 2025 – Present

- Developed a custom sales and inventory management application using **Laravel** and **MySQL**.
- Centralized daily operations to automate product tracking, significantly reducing manual stock entry errors.
- Maintained the live application and performed database updates.

## Freelance Full Stack Developer | Coopérative Agricole Assafae

Azrou, Morocco | Apr 2025 – June 2025

- Engineered a digital stock management system to replace manual logging for a biological products cooperative.
- Implemented real-time product tracking and entry/exit management using Laravel, improving inventory traceability.

## Full Stack Developer (Intern) | Azrou Center for Community Development

Azrou, Morocco | Mar 2025 – Apr 2025

- Collaborated on the maintenance of web applications, contributing to backend API logic and frontend UI adjustments.
- Optimized code quality and performance for internal social impact projects.

## **EDUCATION**

### Professional License in Computer Engineering (Génie Informatique)

High Tech Rabat | Nov 2025 – Present

- Focus: Software Engineering, Artificial Intelligence, and Advanced Database Systems.

### Specialized Technician in Digital Development (Full Stack)

ISTA NTIC (OFPPT), Azrou | Sept 2023 – July 2025

- Graduated with a focus on web development technologies and database management.

## **CERTIFICATIONS**

- **Cisco:** Python Essentials 1, Introduction to Cybersecurity, IT Essentials (Hardware).
